

We are able to provide Plasma Arc Cutting and design services. Using the latest and fastest cutting process, CNC controlled double plasma arc cutting heads will precision profile your products, making maximum usage of raw materials to ensure minimum wastage. Customers can send us their own drawings by Electronic Mail, which after verifying can be fed directly via fiber optic link from our design office to the machine.

SPECIFICATIONS:

Plasma Arc Cutting (CNC operated)

- Able to cut ferrous and non-ferrous materials
- Two plasma cutting heads
- One Oxy fuel cutting tables
- Ability to cut under water
- CNC operated with Fiber Optic Transfer

Logistics

DHES will ensure that output quality is maintained and that finished product meets international quality standards

We are able to hot-dip galvanize finished product and specialize in packing, shipping and logistics solutions to deliver to any world-wide location.
